

## **CT University Partners with EC-COUNCIL**

### **EC-COUNCIL**

The cyber security skills shortage is the biggest cyber security issue we face today. Cyber Security jobs are in great demand and going accross economy. The professional services, finance,manufacturing, defense sector have the highest demand for cyber security. Cyber security openings have gone three times as fast as openings for IT Jobs.To combat the challenge, CT University and EC-Council have partnered together to start programs in Information Security and Cyber Security. CT University and ECCouncil going to establish Cyber Wellness Centre (CWC) to promote Cyber Security awareness mission.

### **OBJECTIVE**

Under its umbrella, the CWC provides training in business-critical consulting and counter measures, in the field of cyber security, IT disaster recovery, emergency and crisis management, digital forensics, and information security management. Its objective is to increase organizational and community awareness about cyber security and promotes the practice of securing the cyber space by following best practices and defense mechanisms while strengthening the protection of systems and data. CT University and EC-Council are providing certifications like EC-Council Certified Secure Programmer.Net, EC-Council Certified Disaster Recovery Professional, Licensed Penetration Tester – Master, etc.
